DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Chen et al.

Chen et al. teaches a comprehensive system for producing and distributing on-demand presentations over a network (column 1; lines 19-20). Chen et al. teaches that elements of the presentation invention are included within a client-server system in which one or more presentation servers communicate with one or more clients. The clients transmit and receive data from the presentation servers over a variety of communication channel including local area networks or the Internet (column 2; lines 40-55) (The clients of Chen et al. represent the presenter and the reader; the presentation servers represents the presentation material publishing server which is accessed by the clients/presenter/reader via a network).

Chen et al. teaches implementing various types of business methods using the presentation system. In particular organizations may pay a one-time fee for the service and then end users or employees would not be charged to view the presentations. In another embodiment

taught by Chen et al. end users would access the presentation on a pay-per-view basis (column 6; line 53 – column 7; line 20) (performing a credit process prior to uploading presentation material). Chen et al. teaches charging a fee to view over a specified period (column 7 ; lines 5-6)(public information contains publication period). Chen et al. further teaches maintaining a searchable database of on-demand presentations on the presentation server, in which stored presentations are categorized in an index, allowing users to search for a presentation on a particular topic (column 5; lines 22-30).

Examiner notes that it is inherent to the system of Chen et al. that public information (defined by applicant on page 25; paragraph 2 of the specification as the presentation time of the materials, category information and downloading permission information”) be collected, as it is necessarily required to collect this information (such as category or permission data) in order to know how to charge the user to view the presentation and to allow the user to search by category. (User registration of a presenter is performed; public information contains at least category or browsing permissions). Additionally, Examiner notes that it is inherent and necessarily present in the invention of Chen et al. that the target address is notified to the presenter/client only after uploading is permitted, as it would make no sense to provide that address if the uploading were not permitted.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Kramer whose telephone number is (703) 305-5241. The examiner can normally be reached on Monday - Friday (8AM - 5PM).
